Education

Rutgers University-New Brunswick — Expected May 2028
Bachelor of Science in Computer Science and Electrical Engineering — GPA: 3.8/4.0

Professional Experience

Johnson & Johnson | Software Engineering Intern (Incoming) — Hybrid, Spring House, PA | Jan 2027 – May 2027
- Incoming platform and cloud engineering co-op, working across **AWS**, **GenAI**, and **DevOps** tooling to build and integrate services

NJ Department of the Treasury | Technology Intern — Hybrid, Trenton, NJ | Sep 2026 – Present
- Reviewed the Division of Risk Management's claims platform, gathering staff and client feedback to surface usability improvements
- Organized **1,000+** claims records across **Salesforce** and claims portals, cleaning **CSV** data and streamlining workflows

361Firm | Software Engineering Intern — New York, NY, Part-Time | May 2026 – Sep 2026
- Streamlined event check-in by building a QR-based attendance tracker in **JavaScript**, **TypeScript**, **React**, and **Tailwind CSS**
- Cut requests per full load from **251 to 26** by driving a migration from **Airtable REST APIs** to **Supabase (PostgreSQL)**
- Sped up feature delivery by refactoring the **React** codebase into modular, tested components on a **Git** and **CI/CD** workflow
- Blocked malformed and malicious input by hardening **6 REST API routes** in **Next.js** on **Vercel** with server-side validation

Verno (YC F26) | Software Engineering Intern — Remote, Part-Time | Jul 2026 – Aug 2026
- Prevented invalid edits from saving by building shape-editing tools in **Electron**, **TypeScript**, and **CSS**, verified by **21 tests**
- Gave customers a secure CSV export to review their data by engineering it in **JavaScript** with **Git**, backed by **19 tests**
- Enabled engineers to organize edits in a verifiable history by delivering a full-stack feature in **React**, **Zustand**, and **Python**

JukeBox | Software Engineering Intern — Remote, Part-Time | Jul 2026 – Aug 2026
- Built the concert rating tab in **React Native** and **TypeScript** via **Expo/EAS**, letting users rate and discover concerts nearby
- Cut external **API** calls per repeat search from **2 to 1** by caching results in an **Express** and **Node.js** search service
- Modeled rating data in **MySQL** with **SQL** constraints, integration tests, and **Git**, keeping records clean and duplicate-free

Projects

AI Cost Metering Platform | Python, FastAPI, Next.js, Supabase
- Built a metering proxy and smart router intercepting every **generative-AI** call across **6 providers**, logging cost and latency live
- Designed a cost-aware router sending each request to the cheapest model meeting a quality tier, with fallback chains

Computer Vision Workout Coach | TypeScript, React, Vite, MediaPipe
- Built a hands-free webcam workout coach counting reps and checking form in real time with **MediaPipe**, fully on-device
- Engineered a pure **TypeScript** analysis core with pixel-space angle math, one-euro smoothing, and rep detection across **58 tests**

PC Forecaster | Python, scikit-learn, Flask, SQLite, Pandas
- Shipped a live PC-parts price forecaster on **Vercel** using **Random Forest** models, forecasting prices at **R^2 0.85 to 0.89**
- Engineered a 5-stage **Python** pipeline cleaning **9,452 records** into a 71,000-row monthly price history for model training

Leadership

Mexican American Student Association | Public Relations Chair — Rutgers University | Sep 2025 – Feb 2026
- Planned and coordinated events as PR Chair, producing weekly promotional content that boosted turnout and engagement
- Managed the organization's promotional budget, delivering campaigns on budget while growing its social media reach
- Partnered weekly with the executive board to align messaging, plan programming, and keep organization events on track

ColorStack | Member — Rutgers University | 2025 – Present
- Engaged with the ColorStack community through hackathons, networking events, and professional development opportunities

Technical Skills

Frameworks/Libraries: React, Next.js, FastAPI, Flask, Express.js, Node.js, MediaPipe, scikit-learn, Pandas
Languages: Python, TypeScript, JavaScript, Java, SQL, C, C++, HTML/CSS
Developer Tools: Git, GitHub, AWS, Vercel, Supabase, PostgreSQL, MySQL, SQLite, Docker, Vite, CI/CD
Other Skills: Machine Learning, REST API, Prompt Engineering, LLM Integration, Agile
